CLIENTS, HSE & WHY CHOOSE US

Trusted by Offshore Industry Clients

Surya Subsea Services has supported projects involving leading oil & gas operators, marine contractors and offshore service companies.

Client Portfolio:

HSE Commitment:

Safety is central to every subsea and offshore operation we support. We are committed to safe working practices, responsible project execution and compliance with client and industry requirements.

Why Choose Us:

Experienced Offshore Support

Hands-on project involvement across subsea, diving, ROV & underwater inspection scopes.

Integrated Capabilities

Services covering inspection, maintenance, installation support, positioning & manpower.

Responsive Project Execution

Flexible support for project-specific requirements & offshore operational needs.

Professional Technical Team

Experienced personnel with practical understanding of offshore & underwater operations.

COMPANY OVERVIEW

Your Trusted Partner for Subsea & Underwater Services

Surya Subsea Services Sdn. Bhd.

is a Malaysian subsea and underwater services company supporting offshore oil & gas operations through reliable technical expertise, experienced personnel and efficient project execution.

We provide integrated subsea support including diving operations, underwater inspection, ROV services, maintenance, installation support, positioning, navigation and manpower solutions.

Key Highlights :

Malaysian subsea & underwater services provider

Offshore oil & gas project support experience

Strong capabilities in Diving, ROV, Inspection & Maintenance

Focused on safety, reliability & technical performance

- 20+ Projects Completed
- Since 2018 Project Experience
- Oil & Gas Offshore Support
- Subsea & Underwater Specialist Services

WHO WE ARE

Built for Demanding Offshore Environments

Surya Subsea Services supports the growing demand for reliable subsea and underwater solutions in the offshore energy sector. With hands-on experience across inspection, maintenance, diving, ROV support and offshore project execution, we help clients operate with confidence in challenging marine environments.

Our approach combines technical capabilities, operational readiness and responsive project support.

Core Values :

Safety

Safe execution in all offshore & underwater operation.

Reliability

Dependable support through an experienced team & proven project practices.

Technical Competence

Practical subsea knowledge for inspection, maintenance, installation & operational needs.

Client Focus

Responsive solutions aligned with client project requirements.

CORE SERVICES OVERVIEW

Integrated Subsea & Offshore Support Services

We provide a structured range of subsea & offshore support services designed for oil & gas clients, marine contractors and offshore asset owners.

01 Inspection, Repair & Maintenance

Subsea inspection, repair & maintenance for offshore facilities, pipelines & structures.

02 Transportation & Installation Support

Offshore transportation & installation support for marine and subsea Projects.

03 Underwater Services & Maintenance

Underwater maintenance for marine structures, vessels offshore facilities & subsea assets.

04 ROV Operations & Services

ROV support for inspection, survey, monitoring, remote intervention works & underwater visual assessment.

05 Positioning & Navigation Services

Above-water & underwater survey, positioning & navigation support for offshore project accuracy.

06 SPM/SBM Installation

Support for Single Point Mooring & Single Buoy Mooring installation, inspection & maintenance activities.

07 Floating Production System

Support for floating production assets, including inspection, maintenance & subsea operations.

08 Diving Operation & Services

Professional diving support for inspection, repair, maintenance, installation, and subsea intervention.

09 Manpower Provider

Experienced offshore, diving, ROV, inspection & technical personnel support.

DIVING & UNDERWATER SERVICES

Specialized Diving & Underwater Maintenance Support

Surya Subsea Services provides professional diving and underwater support for offshore facilities, marine structures, pipelines, vessels and subsea assets.

Diving Operation & Services :

- Air Diving Support
- Saturation Diving Support Coordination
- Offshore Diving Personnel
- Underwater Cutting & Cleaning Support
- Subsea Intervention Works
- Diving Support for Inspection & Maintenance

Underwater Services & Maintenance:

- Underwater Hull Inspection
- Marine Growth Removal
- Anode Retrofit Support
- Offshore Structure Inspection & Maintenance
- Pipeline-Related Underwater Works
- UWILD Inspection Support
- Underwater Repair & Maintenance Assistance

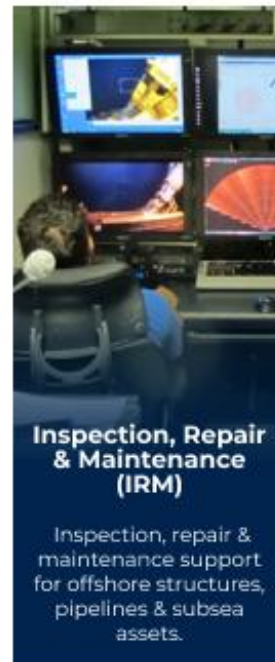

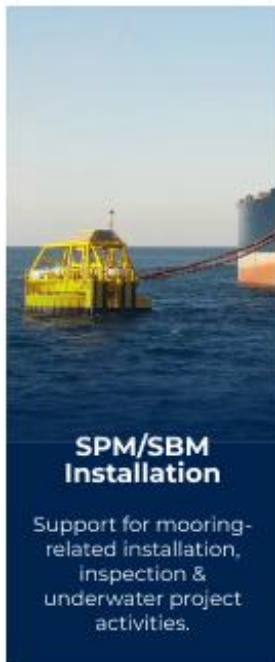

Capability Statement:

Providing safe, efficient and technically reliable offshore operations support across inspection, maintenance and project execution scopes.

OFFSHORE PROJECT SUPPORT CAPABILITIES

Supporting Complex Offshore Project Execution

Surya Subsea Services supports offshore project execution through installation support, floating production system services, SPM/SBM support, positioning, navigation and manpower provision.

Section Statement:

From inspection to installation support, we help clients execute offshore operations with confidence.

TECHNICAL CAPABILITIES

Technical Capabilities for Subsea Operations

Our technical capabilities are built around practical offshore execution, experienced personnel and project-specific support for subsea and underwater operations.

Capability Matrix:

Inspection & Survey	: ROV inspection, pipeline survey, underwater NDT, GVI, UWILD inspection.
Diving & Maintenance	: Air diving, saturation support, marine growth removal, anode retrofit, underwater repair.
Offshore Support	: Installation support, positioning, navigation, manpower, FSO/FPSO support.

PROJECT EXPERIENCE

Proven Experience Across Offshore Projects

Surya Subsea Services has supported offshore and subsea projects involving diving services, ROV support, inspection, maintenance, survey, installation and underwater operational scopes.

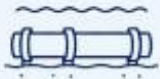

Track Record Highlights:

Project experience from 2018 to 2025

Support for offshore oil & gas clients and contractors

Experience across FSO/FPSO, MOPU, platforms, pipelines, vessels & subsea structures

Capability to mobilize technical personnel & project equipment

Timeline Summary:

2025

ROV & diving operations, underwater inspection, MOPU survey, debris survey & cleaning support.

2024

Transportation and installation support, ROV pre-lay survey, caisson replacement diving services, platform baseline survey & UWILD services.

2023

Diving system rental, air diving services, saturation and air diving support, DSV & decommissioning support.

2022–2018

Air diving services, UWILD, underwater class inspection, hull inspection & in-water survey works.

MAJOR PROJECTS HIGHLIGHT

Selected Project Highlights

Selected project experience reflecting our capability to support offshore clients with reliable subsea services, technical manpower and operational execution.

Project 01 :

- Client** : Carigali Hess Operating Company Sdn. Bhd. / KL Petrogas Sdn. Bhd.
Project : Provision of Underwater Inspection Services for Carigali Hess Facilities
Scope : ROV and diving support vessel, ROV spread and personnel, diving spread and personnel, survey spread, NDT spread, and inspection personnel.

Project 02 :

- Client** : Shell / Allseas Marine Contractors Sdn. Bhd.
Project : Rosmari & Marjoram Field Development Project
Scope : Work-class ROV with TMS and survey spread support for trunkline and flowline ROV pre-lay survey activities.

Project 03 :

- Client** : Petronas Carigali Sdn. Bhd. / Tanjung Offshore Services Sdn. Bhd.
Project : Zuhai East Debris Survey & Removal Services
Scope : ROV support vessel, ROV spread and personnel, survey spread and personnel, and inspection spread.

Project 04 :

- Client** : Sapura Offshore / Chevron Decommissioning Campaign
Project : Provision of Air Diving Services
Scope : Air diving spread, diving personnel, pipelay support, platform installation support, and subsea-related diving assistance.

Project 05 :

- Client** : Sapura Offshore
Project : Provision of saturation & Air Diving System on Board S1200 for Kawasari Pipeline Campaign
Scope : Pipeline Installation, E11R-AA Riser & Riser Guard Installation, KSCPP Riser
